

## SDK\_MOSTAPP: Eclipse Project Setup

### 1. Open a project:

Apply the following steps:

1. Click File → New → Project → Java Project.
2. Brows to your SDK folder location.
3. In source tab:
  - Make sure that you've 3 folders marked as source folders (p3AppManager\_micro/src, spectromost\_micro/src, release)
  - In case not all of the previous folders were marked as source folders, right click on that folder and select "Use as source folder".
  - Ensure that the "Default output folder" field contains the path to the bin folder.
4. Press finish.

### 2. Run configuration:

In the run configuration window apply the following steps:

1. Java Application → new configuration.
2. In main tab: main class → search for(Userinterface).
3. In argument tab :
  - VM arguments: write the following command:  
-Djava.library.path="bin\_path\_inside\_SDK\_folder"  
-Dswing.defaultlaf=com.sun.java.swing.plaf.nimbus.NimbusLookAndFeel
  - Working directory→ \${workspace\_loc:SDK\_MOSTAPP/bin}
